

FREE Monthly Webinar Services Presents:

Computer Security is Everyone's Responsibility

Tuesday, November 16, 2021 at 2 p.m. (Eastern)

Computer Threats continue to grow with 75% of cyber attacks hitting small and medium businesses. 7 US companies an hour are being hit with Ransomware and Business Account Takeovers result in billions of dollars of loss to companies every year. The solution to these problems is not only about technology - people remain the weakest link and we have to start with education people about the threat.

James Morrison joined Hewlett Packard Enterprise (HPE) in December 2019 from the Federal Bureau of Investigation (FBI) as a Distinguished Technologist - Cyber Security in the office of the North America CTO.

James spent 22 years with the FBI as a Senior Computer Scientist, focused on cyber security. He worked on numerous national security and criminal intrusion investigations, as an active Cyber Security Expert, identifying security vulnerabilities and implementing solutions. He was a Regional Program Manager for the FBI Computer Science program and Adjunct Faculty Member for the FBI, teaching multiple classes at Quantico and internationally
